

ΣSprint Report #2

Product Name: Smart Budget

Team Name: FTX

July 10, 2023

Actions to stop doing:

- Making many large pushes instead of multiple shorter ones. Multiple smaller pushes are better for others to understand what is going on.
- Using poor communication methods. Better collaboration between the team which tasks we are working on.
- Missing meetings degrades communication between team members, loosening the cohesion of the project.

Actions to start doing:

- Using pings more often on Discord when communicating with specific people so that communicating becomes easier.
- Make sure you know what each team member is working on, to prevent working on the same page and wasting resources.
- If assigned a task, complete it on time
- Demand for assistance on a task if necessary so as to not stunt progress because of individual developers.

Actions to continue doing:

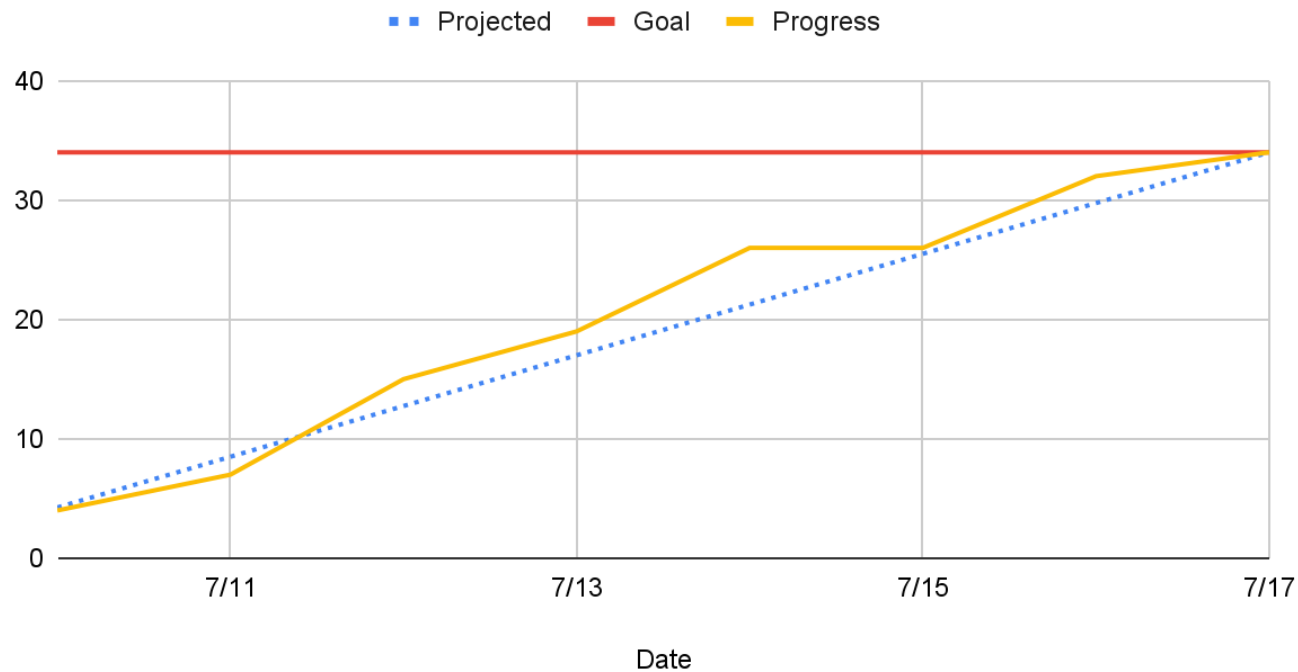

- Meeting every day has produced better results in terms of cohesion and teamwork
- Attempt to work ahead of the schedule, in this case, if something goes wrong and some tasks would cause difficulties, the saved time from working ahead of time would help us to stay on the schedule.

Work completed / not completed

- Form for adding income and expense information and make it viewable to keep track of cash flow.
- Form for creating a budget and making it viewable
- Form for setting saving goals, and making it viewable
